DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed (on 17 July 2006) in this application after final rejection (mailed 17 February 2006). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's Amendment filed on 19 June 2006 has been entered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

- 3. Claims 1-10 and 12-21 (renumbered as claims 1-20) are allowed.
- 4. The following is an examiner's statement of reasons for allowance:

The present invention comprises a pointing device. The closest prior art, Maeda (US 6,512,510) discloses a pointing device [Figs. 1 & 3; P1] including: a sensor substrate [Figs. 2 & 3; 8] having a flat board form; a stick member [Fig. 3; 2] vertically provided on one surface of the sensor substrate; first [Fig. 3; 9a & 9c] and second [Fig. 3; 9b & 9d] pairs of strain sensors

··.

Art Unit: 2629

formed on another surface of the sensor substrate that is opposite to the one surface on which the stick member is provided, the strain sensors in the first pair and the second pair being respectively arranged in symmetrical relation to each other with respect to the stick member; and slits [Fig. 3; 6 & 8d] formed in the sensor substrate, each slit being constructed from a first slit portion positioned at a side of one of the strain sensors in the first pair and a second slit portion positioned at a side of one of the strain sensors in the second pair, the first slit portion and the second slit portion being connected to form the slit in an L-shape (see Column 5, Line 34 - Column 6, Line 64).

However, Maeda does not expressly teach a stick member vertically provided on one surface of the sensor substrate, a portion of a bottom surface of the stick member in direct contact with the one surface of the sensor substrate. This distinct structural arrangement has been incorporated into the pending independent claims (i.e. claims 1, 14, 15, and 21), thereby rendering them allowable.

Any comments considered necessary by the applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff Piziali whose telephone number is (571) 272-7678. The

examiner can normally be reached on Monday - Friday (6:30AM - 3PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala can be reached on (571) 272-7681. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
